My intention for taking your valuable time is due to establishing a possible partnership between your institute and Galip ÖZTÜRK Multi-Program High School within the frame of The **Leonardo da Vinci Mobility Program Partnership**. For your interest I summarize briefly the planned project here.

If the subject attracts your interest, please contact us to discuss further issues related to the project. However, if you think that this subject is completely out of

your interest please accept our apology for taking your time and if there is such a school , factory and firm which is interested working with us within the framework of Leonardo da Vinci programmes, would you write us their e-mail adress and web site adress, please? After that we are going to prepare an Application Form. We will need your Letter of Intent for the application.

Our goal is to realize a study visit within the Leonardo project for the aims of establishing structural connections, transferring technology, developing the Project of partnership school and being in a constant co-operation with you.

Our Project is "Vocational training with animation" : Development of a training computer assisted a didactic animation program for teachers in the technical school system and design an e-learning web site about computer animation application for use in vocational training

- to design an e-learning web site about computer animation application for use in vocational training
- to contribute to the regional development and cause co-operations with the training centers and the bussiness sectors.
- to contribute to the integration of the vocational training system in Europe
- to strengthen the co-operation with the training institutions and the industrial enterprises.
- to share the experiences with other schools
- to develop the skills of occupation, language, attitudes and interaction with different cultures, to transfer the knowledge and experiences.

We are looking forward to hearing from you.

Best regards,
